

Understanding the Illegal Children Crisis

by

Phil Rasmussen

Would you put the safety of your child in the hands of another person? Most people would probably say “No,” but they do this every day they send their child to school, whenever they enroll their child with a club or sporting team, and allow their child to go play or interact with neighboring children and friends. It is very common to allow others, outside of your family, to watch over or take care of your children.

And yet, we are appalled that parents of migrant children will put the welfare and safety of their children in the hands of strangers, or older siblings to take them to America. We have difficulty in understanding how any parent can allow this because we have not lived under a repressive government, a disastrous economy, or the violence of gangs and political thugs. However, we needn't worry too long, because that is what is coming to our nation.

We are seeing and experiencing overnight changes in our society and government. Additionally we are seeing increased drugs, violence, and gang activity brought upon us by our own people and those entering our nation illegally and not vetted.

These changes are a result of the traitorous actions of socialists and leftists who want to destroy our morals and ethics and pandering to the poor and disenfranchised populations of the world by “inviting” them to come to America.

Their turncoat actions have created a child immigration crisis on our southern border. It is called crisis because of crowded conditions, taxpayer money is used to house, feed, teach, and transport these children. We are told that the children come here to escape economic, social, and political situations at home. But that is not the real reason.

However the real crisis is yet to come. After these children are “released” into the public, the real crisis begins. These children, ranging in age from toddlers to teenagers, will be eligible for 13 major federal welfare programs. When adding benefits from state and local governments, and non-profit organizations this becomes a lot of taxpayer money being spent on illegal children.

You probably don't realize it, but each child will probably receive welfare benefits until age 21. Also, in as little as 3 years it's possible for them to apply for US citizenship. Once citizenship is obtained and the child is 18, they may be eligible to sponsor another immigrant. Once the immigrant enters the US, if the sponsorship fails, the welfare cycle

may repeat itself, costing more money. This welfare cycle will cost future taxpayers an inordinate amount of money. This drastic impact will drive our nation further into the ground, and, if not brought under control, turn us into a third world country.

When looking down the road, toward what will come, if unchecked, it is no wonder that the impact of the high-handed financial changes being made by the current administration is not being fully disclosed.

The pejorative attitude of the socialists and leftists toward conservatives cannot and should not go unchallenged. If we don't stand up to these bullies, if we don't speak out, if we don't bring their disgusting, unlawful and traitorous behavior to light, then we are a doomed nation.
